GLOSS COLLECTION

The Gloss collection combines craft know-how experimentation. The essence of the brand shines through every single piece of the collection, in their bold lines, vivid colours and high-quality laminated materials.

The collection reinterprets the brand's core values with the gloss in mind, elevating its aesthetics and authorships through highlighting the brightness and light emitted by our frames.

Together with bold colour ranges and synthetic design, the introduction of translucent acetates when laminating colors, resulting in different shades and vibrant combinations. Keeping our DNA in mind, we continue to use some of our most iconic acetates adapted to the latest trendy colors, while maintaining our social commitment by using eco-friendly acetates.
